INTRODUCTION

Continental Resources, Inc., an established and well respected name in the sale, lease and rental of computer hardware and electronic test instruments is proud to introduce you to our 1981 Minicomputer and Word Processing Supplies Catalog.

There are thousands of items to choose from! You can now enjoy the convenience and ease of one-stop shopping, with the Continental Supplies Catalog. You'll find all the products that are necessary for today's computer systems—all at unbelievably low prices.

Flexy disks, CRT stands, labels, printwheels, ribbons for almost every machine imaginable. Cables, connectors, break-out-boxes, acoustic sound covers (they quietize even the noisiest of machines), transfer switches, computer paper, and more...much more.

Throughout the year we will continually update our catalog listings so that we can pass on to you the best of the latest products, always at low cost. So that we can continue to inform you of our product updates, please fill out the enclosed postage-free post card.

All our products are made from the highest quality materials and they come with our assurance that if you are not completely satisfied, you can return any item for a full refund, exchange or credit. Just call our Customer Service department at 800-225-3730 for immediate service.

STANDARD TERMS AND CONDITIONS & GENERAL INFORMATION

Terms of Payment:	Invoices are net payable upon receipt. Initial order COD or cash in advance until credit is approved.
Credit Policy:	Continental reserves the option of credit approval based upon receipt of pertinent information (see back of order form). Shipments will be suspended when payment is 15 days past due. 1½ % per month (or maximum allowable by law) added to all past due accounts.
Minimums:	\$40.00 per order. \$2000.00 per annual release order.
Returns:	No returns are authorized without a return authorization number. All claims must be made within 5 days receipt of goods. 15% restocking charge for all products returned to stock that are not defective.
Guarantee:	All products are guaranteed against manufacturing defect for 30 days from date of shipment. Continental cannot warrant damage resulting from misuse or improper storage, nor shall we be liable for incidental or consequential damages.
Emergency Service:	Phone Continental by 2 p.m. (our time) and your confirmed order will be shipped that day by the fastest available carrier.
Free Freight:	Continental will pay surface freight on your order (except unusually heavy or bulky items specified on product pages) if you include full payment with your order.
Normal Freight:	All orders are normally shipped within 24 hours via surface transportation. Freight charges (FOB Bedford, Massachusetts) are prepaid and added to your invoice.
Taxes:	Applicable taxes, such as federal, state, local excise, sales and similar impositions, will be billed to the customer as separate items on our invoice unless you furnish Continental with a satisfactory tax exemption certificate prior to shipment of merchandise. Where taxes are required by law to be included in the price, they will be so billed. The customer is obligated to pay such taxes imposed on the manufacturer, sales or use of our products even though they are not billed at the time of the sale.
Annual Contracts:	Continental Resources' experienced nationwide sales force in the fields of computer hardware, and computer supplies has the expertise necessary to design an annual supplies contract that will suit the needs of your company. Our annual contract will enable you to realize considerable savings above our already low catalog prices. In addition, you will eliminate the paperwork inherent in constant re-ordering procedures and you will be assured of always having stock on hand.

ALL TERMS AND CONDITIONS SUBJECT TO CHANGE WITHOUT NOTICE.

The Most Widely Used Acoustic Coupler! - Now, from Continental Supplies

Continental is now making available a huge inventory of AJ 242 A acoustic couplers.

These very reliable couplers are used for many applications in businesses just like yours. The 242 A utilizes solid state circuitry, thus assuring accuracy and stability.

Features:

- Communication up to 450 baud
- Bell 103/113 compatible
- Solid state circuitry
- Sensitivity better than - 50bd Bm
- Quartz crystal oscillator circuitry in transmitter
- Switch selectable full or half duplex
- Compatible with EIA or 20mA interfaced terminals
- New cup design with positive handset lock
- User-oriented carrier detector
- Special rubber feet for extra vibration insulation

Special Offer! (while they last)

CONTINENTAL QUALITY RIBBONS

We guarantee compatibility with your printer!

Continental's Ribbon Inventory

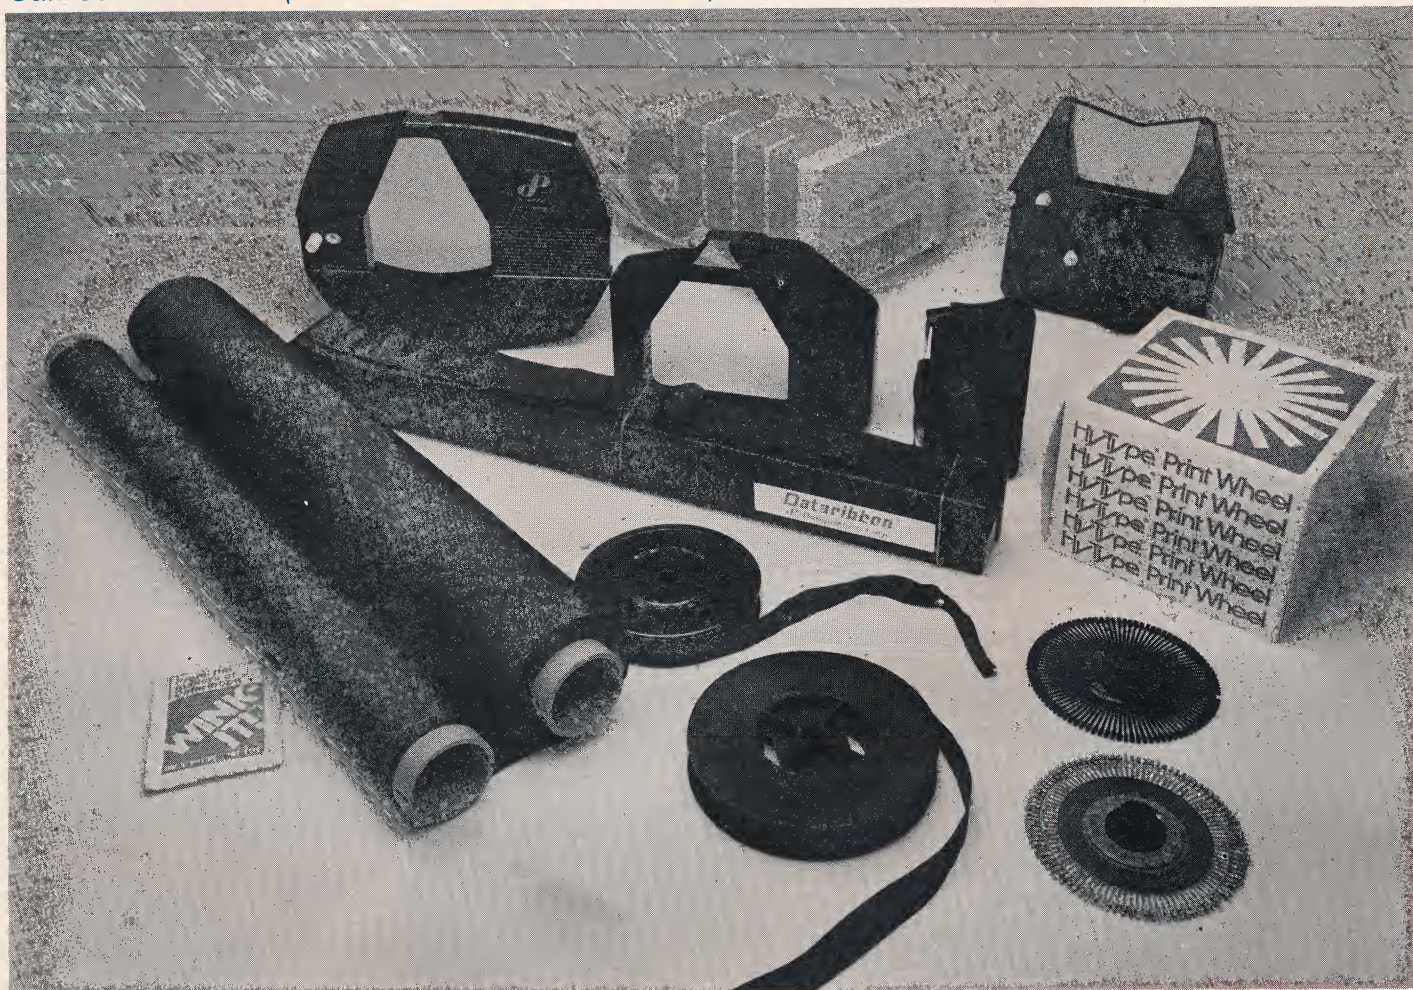

Continental offers one of the widest selections of printer ribbons for your data processing and word processing machines. Whether you use wide ribbons, narrow ribbons, matrix ribbons, or cartridge ribbons ... Continental can meet your specifications.

We stock ribbons compatible with many IBM, NCR, Burroughs, Qume, Centronics, Diablo, Data Products, Digital Equipment, Teletype and many other printers. All of these ribbons are manufactured from the very highest quality materials. And because we turn over such a large volume of ribbons, you are assured of the freshest, best-priced ribbons available.

These ribbons will consistently give you clear, concise print, line after line after line after...

But, more important than anything else, all our ribbons meet manufacturers' specifications, so that you can use them with full confidence that it is the best product for you. And, we stock all our ribbons for immediate shipment. So order now!

A New and Inexpensive way to protect your valuable flexible disks!

MAGNETIC MEDIA FILING SYSTEMS

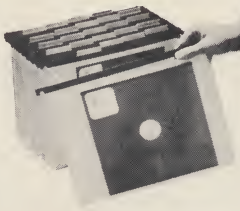

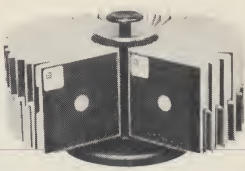

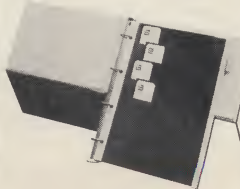

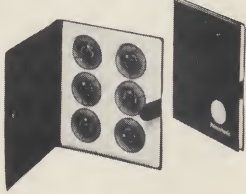

The cost of Continental's convenient Magnetic Media Filing Systems is next-to-nothing when compared to the potential loss, if one or more of your disks is damaged. Dirt, dust, water, coffee, magnetized paper clip holders, heavy weights are all potential destroyers.

Keep your loss risks from heat and moisture limited with these attractive, lightweight and colorful filing systems.

Another convenient, low-cost offer from Continental!

Now, Continental offers you top-of-the-line...

The BASF FlexyDisk® is a sophisticated storage medium combining the economy of tape storage with the versatility of disk storage. BASF's FlexyDisk® is cut from the finest, prestressed polyester, and the oxide coating is of the superior quality and smoothness you have come to expect from the inventor of magnetic tape. Each disk is burnished to eliminate drag and any potential dynamic stresses. And to ensure ultimate surface smoothness and hardness, BASF applies a special surface treatment to each FlexyDisk®. The jacket, which contains a self-cleaning liner, supports and protects the disk and serves as a loading device.

Important. Each BASF FlexyDisk® is certified and guaranteed to be 100% error-free before being shipped.

Continental's Premium Bond ...

the very best computer paper, at the lowest possible cost!

Unlike other companies, Continental only offers top-of-the-line paper. And that saves you lots of money. Why? Because low-grade paper contains a high degree of wood chips. We have been told by many of our customers that the wood chips create potentially damaging dust and undue wear on the print mechanisms. Then, you've got to contend with an expensive repair bill.

We've priced our high quality paper at the lowest possible cost, so that you can save money on paper that won't damage your printer.

Look for Continental's Feather-Pak, a lightweight carton of Premium Bond, for lightweight jobs.

Select your quality **Thermal Paper** from our easy-to-use chart (bottom of this page).

Our CRT Stands WILL Save You Money!

How? It's Simple.

If you're putting your valuable CRTs on standard desks, or on regular typing tables, or on a counter top, you're wasting precious space and money. Continental's classic-styled CRT stands will solve that problem.

A) Tables and desks are incredibly expensive these days. And for all that money, they still can't give you the efficient design necessary for today's workplace. Our CRT stands, while costing far less than conventional surfaces, are specifically designed to give you maximum efficiency.

B) You can fit these stands in relatively small spaces. In fact, three of our stands can be lined along a 12-foot wall. And they stand independent of one another. This means that when one stand is bumped, it doesn't effect the key-ing operations of the neighboring terminals.

C) The stand-up and sit-down models are designed specifically for that function which means that they are set at exactly the correct height for your operators. Better design means faster input and elimination of backloads.

D) It's simple. This easy, efficient and attractive design will help your office budget and increase total capabilities. Look at the tables below and select the stands that best suit your terminals and your office space. If you're not certain of the best stand for your needs, call our professionals and ask them. We're here to help you.

CRT STANDS

CAT. NO.	SIZE	PRICE
7100*-XX	24''x 24''	\$125.00
7110*-XX	30''x 24''	130.00
7120*-XX	30''x 30''	152.00
7130*-XX	36''x 30''	165.00
7140*-XX	48''x 30''	185.00
7150*-XX	60''x 30''	220.00
7160*-XX	72''x 30''	260.00
7170	SET OF 4 METAL LOCKING CASTERS	20.00

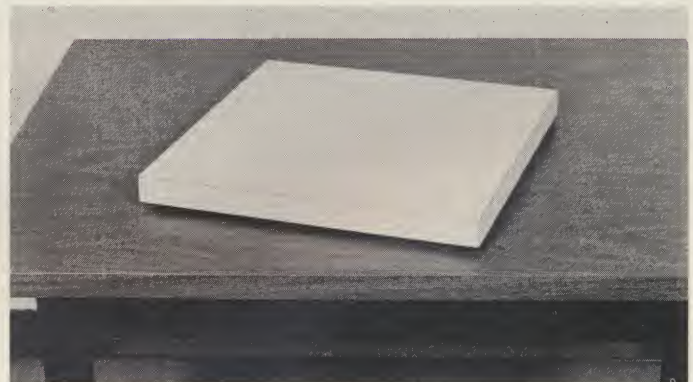

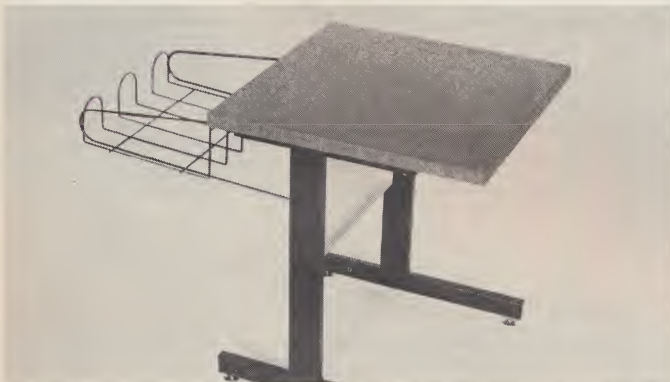

* Our super sturdy CRT stands are designed to handle the most rugged applications. The frames are 1" x 2" tubular steel and the crossbars and bases are hand-welded, not riveted or screwed. **Continental** stands include flat black modesty shield, *your choice of top*, plus black frame and legs.

All models are sent to you partially disassembled to save you added freight expenses. All it takes is 7 minutes with a Phillips screwdriver.

P.S. Our optional set of 4 casters gives you total mobility, and fits all our stands.

*Correct number for work surface color should be substituted for (XX) when ordering: (01) Walnut, (02) Gunstock Walnut, (03) Off-white.

NOT INCLUDED IN OUR FREE FREIGHT OFFER.

SOUND CONTROLLERS BY GATES

The Economical Alternative to Soundproofing

If your business relies on human efficiency, noise can be a serious problem. It can make people irritable, interfere with concentration, and cause costly mistakes.

Whether you have a single terminal or rooms full of data processing and word processing equipment, a daily barrage of decibels may be costing you far more than you realize.

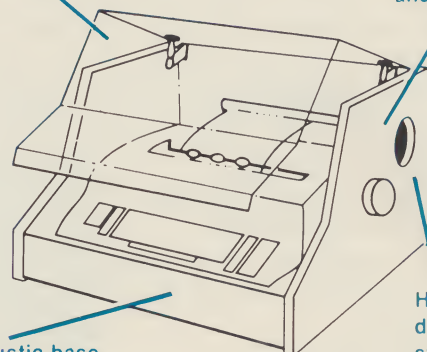

That's why sound controllers prove to be such a wise investment for many firms. They're designed to help maintain or increase the productivity of everyone within earshot of a noisy business machine.

The protective covers do more than block sound. They also guard equipment against dust, dirt, and accidental damage that can cause breakdowns. In addition, many machines generate so much heat that they can't be operated continuously. The fans in these controllers are designed to dissipate heat so efficiently that the machines inside often run cooler than if they were in the open air. So they can run for longer stretches.

So pick out the sleek and smooth sound cover that fits your machine and call or write to Continental. We want to make your business world a little quieter.

See-through acrylic top keeps dust out.

Acoustic insulated enclosure on the sides and back.

Acoustic base reduces low frequency noise.

Heavy duty cooling system maintains proper temperatures, month after month.

Pressure Sensitive Labels...

Smudge Proof and Multiple Widths

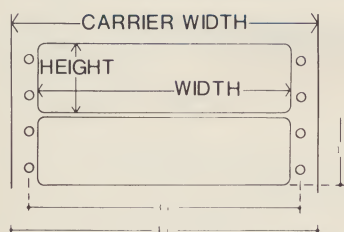

Continental stocks dozens of different types of pressure sensitive labels so that you can choose the right style for your job.

These are all high-quality data processing labels produced on sprocket feed forms, for a faster, more reliable print-out. Continental labels are all guaranteed to tolerate high printing speeds without tearing or jamming. **No down-time. No unnecessary hassles.**

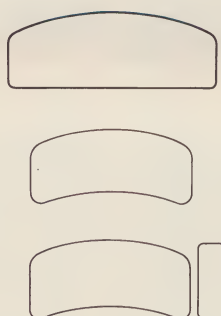

All of these data processing labels can be applied permanently or removed without residue; there's no adhesive bleed at the edge.

If there is a size or style that you need and don't see on the following tables, give us a call. We're constantly up-dating our in-stock inventory.

SPACING: Labels have 1/16" between rows; 1/10" between columns on multiwidth products

PERFORATIONS: Vertical perfs between columns on multiwidth products. Horizontal perfs every 12", except products noted by (*) which are perforated horizontally between every label.

EXCEPTIONS: Cheshire—Spacing: Label rows are spaced to repeat every 1". Perfs: No vertical perfs.

Prices are subject to change without notice.

Protect Your Disk Drives . . .

with Continental Filters!

Would you purposely expose your valuables to unnecessary dangers? Of course you wouldn't. Then why expose the read/write heads of your valuable disk drives to damaging external elements?

Thousands of users, after having to replace damaged heads, are now using low-cost disk drive filters with gratifying results. Breakdown, resulting from dirt particles and impurities, has nearly disappeared and the savings are tremendous.

The handy compatibility chart will allow you to match your disk drive with the proper filter. If you have any questions though, simply dial 800-225-3730 and ask for the filter expert.

*Remember: All Continental disk drive filters meet H.E.P.A. and AACC standards and are made with UC listed materials.

DATA COMMUNICATIONS DEVICES

STATUS ACTIVITY MONITOR

(Status Activity Monitor—for any RS-232 interface) The "Pocket Test Set"

Use this for those situations that require the continuous monitoring of active RS-232 interface levels. Slip it out of your pocket for temporary insertion into the interface line or mount it permanently into the interface for those devices that have no display diagnostics. SAM's third connector and spare LEDs provide a means to go to the heart of most any interfacing problem.

FEATURES:

- No batteries required (No AC either) • Fits into your pocket • 2 spare LEDs for high, low and positive clock indication • 7 continuously monitoring LEDs • Low current consumption - 4mA max per signal line • Voltage protection to ± 75 VDC • Spare 25 pin EIA connector • May be permanently installed into the interface for remote diagnostics

SPECIFICATIONS:

- 2 1/2" x 4" x 1/2" • 4 ounces • Enclosure - .032 steel • Display levels - +3 to +25VDC - two spares, one -3 to -25, the other +3 to +25VDC • Current - 4mA max. per signal line • Connectors - 2 each DB 25 female, 1 each DB 25 male, in parallel
- WARRANTY—One Year

STATUS ACTIVITY MONITOR "PLUS"

Status Activity Monitor (A Complete EIA RS-232 Interface Test Set)

This EIA Test Set offers you complete control of your RS 232 interface leads. Monitor, open circuits, reconfigure and patch any or all of the 24 active positions. Eleven LEDs, 24 switches and 60 jumper positions "make it happen."

FEATURES:

- No battery or AC power required • 24 switches for circuit control • Standard 22 AWG solid wire used for patching • 11 LEDs for monitoring • Jumper positions • Retractable cable connector • "How to use" instructions included

WARRANTY—One Year

BREAK OUT BOX

(A Break Out Box for the RS-232 interface)

The break out box is a small, hand-held device that provides facilities for permanent and temporary reconfiguration of an RS-232 interface. Interconnection of leads is accomplished either by soldering, non-solder jumpers, or both.

FEATURES:

- Fits into your pocket • Every RS-232 lead is accessible • Non-solder jumper points provided for temporary design or experimentation • Access holes provided for additional "external" wiring • Spare positions on the PC board for "bussing"

SPECIFICATIONS:

- No batteries required • 2.4" x 3.2" x 0.62" • 4 ounces • .032 steel enclosure with removable top cover • Solder connections - 50 plated through PC board holes • Non-solder connections - 56 female sockets • Jumper wires - 25 each provided, 2" long, 22AWG

WARRANTY—1 Year

ABCDE TRANSFER SWITCH

Inspired by the standard ABC Switch, the ABCDE provides 2 additional positions for selection. Equipment configurations that require up to 4 devices to share the connection with one other may now be easily "switched" into use.

A single rotary switch, mounted on the front panel of a sturdy chassis makes selection as simple as ABCD. Connection of devices is also simple. Five rear mounted DB 25S female connectors are easily accessed for cable attachment.

FEATURES:

- One rotary switch • Transparent to code and speed • Plug-in connection • Front panel operation

SPECIFICATIONS:

- 7 1/8" x 8" x 3 1/4" • 1.5 lbs. • 5 DB 25S female connectors

WARRANTY—One Year

ABC-25 TRANSFER SWITCH

ABC-25 Switch enables the user to switch a terminal from one modem to another, e.g. 300 to 1200 bps, without changing cable connections. A = 300 baud, B = 1200 baud, C = Terminal OR—use the ABC Switch to permit two terminals to share one modem without changing cable connections. A = CRT, B = Keyboard, C = Modem (any type or speed)

FEATURES:

- One A-B rotary switch • All 25 pin positions are switched • Three female 25 pin EIA connectors • Switch is front panel mounted • Code and speed transparent

SPECIFICATIONS:

- Connectors - 3 female DB25S, all 25 pins wired • Rotary, self-wiping switch • 2 1/4" x 6" x 6 1/2" • 1 Lb.

WARRANTY—1 Year
